

Task 1 - Perform a Full System Scan

- Open Windows Security.
- Click Virus & threat protection.
- Click Scan options.
- Select Full scan.
- Click Scan now.
- Wait for the scan to complete.

Task 2 - Enable Real-Time Protection & Schedule a Scan

Enable Real-Time Protection

- Open Windows Security.
- Go to Virus & threat protection.
- Click Manage settings.
- Turn Real-time protection ON.

Schedule a Scan (Every Sunday at 8:00 AM)

- Press Win + R, type `taskschd.msc`, and press Enter.
- Open:
 - Task Scheduler Library
 - Microsoft
 - Windows
 - Windows Defender
 - Right-click Windows Defender Scheduled Scan.
 - Click Properties.
 - Open the Triggers tab.
 - Edit or create a trigger:
 - Weekly
 - Sunday
 - 8:00 AM
 - Click OK and Apply.

Task 3 - Test Windows Defender Using EICAR

- Visit:
<https://www.eicar.org/download-anti-malware-testfile/>
- Download the EICAR test file.

- Windows Defender should immediately detect it.
- It will usually Quarantine or Remove the file automatically.

Task 4 - Configure Notifications

- Open Windows Security.
- Go to Settings.
- Select Manage notifications.
- Disable all notification types except Critical Threat Alerts.
- Save the settings.
- Trigger the EICAR detection again.
- Verify that only the critical alert appears.

Task 5 - Protection History

- Open Windows Security.
- Go to Virus & threat protection.
- Click Protection history.
- Record the detected threats.
